#### A DRAIN-GARD® SHIELD IS USEFUL

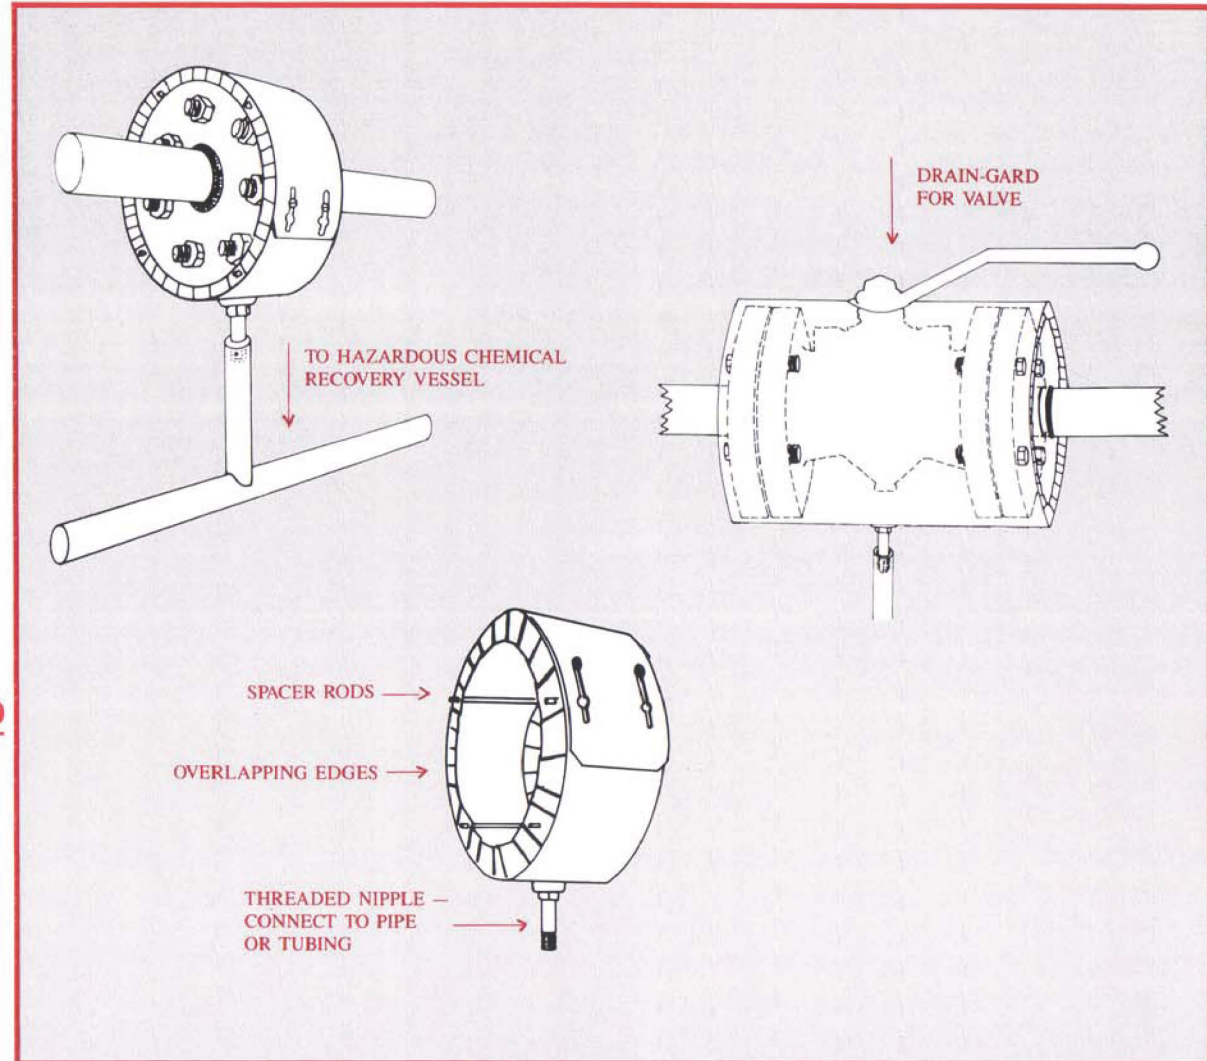

- For flanges, valves and special pipe connections
- Prevents sprayouts from contaminating the workplace
- Allows recapture of chemicals or corrosives
- Directs spillage to recovery containers
- A "must" where secondary containment is necessary
- Ideal on piping located directly over walkways
- Perfect for piping systems used for unloading barges, tankers and trailers to prevent spills into waterways

#### A DRAIN-GARD® SHIELD IS AN ASSET

- Satisfies federal and state regulations for secondary containment of hazardous or toxic liquid chemicals
- Simplifies recordkeeping and tracking of chemical spills and recovery
- Assures safety in critical piping systems

#### A DRAIN-GARD® SHIELD IS SPECIALLY DESIGNED

- Overlapping slotted edges prevent lateral blowout
- Spacer rods create a flow space to dissipate pressure
- A threaded nipple accommodates hose/pipe connection for retrieval and secondary containment
- Produced in "304" or "316" stainless steel for all pipe sizes
- May be customized with an alarm to signal a leak alert
- Many customized versions available
- Is easily installed... Only a screwdriver is required

**ENSURE ENVIRONMENTAL SAFETY FOR PERSONNEL AND EQUIPMENT**
